Stain

- **Sprayed Stain (+0%)** Cider, Toast
- **Multi-Step Stain (+7%)** Charcoal, Dune, Espresso, Fawn Heather, Pewter, Sable, Weathered
- **Hand-Wiped Stain (+0%)** All others

We use three stain options to achieve the highest quality color and coverage. Hand-wiped stains enhance the grain of the wood and create a deep, rich color. Sprayed stains are sprayed on and not hand-wiped. This process is chosen to achieve a more consistent look on tight-grained woods like Maple. Multi-step stains are used to attain darker stain colors. With darker stain colors, the end grain of wood may have a slightly darker appearance. As every tree is unique, there will be much greater variation in both color and the amount of wood grain showing from door to door. Some color variation is to be expected with all stains and is part of the look of natural wood products.

- ✓ **REQUIRED FORM:** Specialty Finish Agreement must be completed and submitted with Multi-Step Stain order.

Finishes

Special Order Program (Loft and Ultra door styles only)

Artizen has selected additional colors specifically chosen to coordinate with popular home interior trends. Below is a sampling of colors available in the Special Order Program. Additional colors may be sourced from Richilieu's Nature+, Brillianté, & Zenit categories. Contact the custom department with product category and color name for availability of colors, pricing and lead times on items not listed below.

Thermo Structured Surface TSS (Nature+)

(Price Column 3 + setup fee of \$2500 list)

Engineered Core panels clad in a Thermo structured surface that replicates both the look and feel of natural materials with a much greater durability. Front and back of door have matching color while the door front has a heavier texture pattern.

Available in horizontal Grain (HG) and Vertical Grain (VG).

- ✓ **Available in Loft door style only.**
- ✓ **Doors will be edge banded in coordinating color to door face**

High Gloss Lacquer (Brillianté – Gloss)

(Price Column 4 + setup fee of \$2500 list)

Lacquer is bonded to an engineered core with a high gloss front and a matte back. Lacquer has excellent heat and scratch resistance. Product is shipped from factory with a protective film.

Available in solid colors.

High Gloss Lacquer Colors:

Magnolia-608Gloss	Cashmere-655Gloss	Basalto-638Gloss	Pale Grey-650Gloss
Indigo-659Gloss	Curry-664Gloss	Pumpkin-665Gloss	Rojo-614Gloss
Black-610Gloss			

- ✓ **Available in Ultra door style only**
- ✓ **Specify "Gloss" on order**
- ✓ **Doors will be edge banded in coordinating color to door face**

Finishes

Matte Lacquer (Zenit – Matte)

(Price Column 4 + setup fee of \$2500 list; Use lacquer column B for non-door product pricing and follow lacquer rules)

Coated with a Matte lacquer and dried using UV technology. The matte finish has a gloss level below 10%.

Lacquer has excellent heat and scratch resistance. Product is shipped from factory with a protective film.

Available in solid colors.

Super Matte Lacquer Colors:

Blanco-Z19Matt	Magnolia-Z08Matt	Cashmere-Z55Matt	Basalto-Z38Matt
Antracita-Z11Matt	Black-Z10Matt	Indigo-Z59	Curry-Z64
Oriental Black-Z58	Oriental White-Z57	Pumpkin-Z65	Pale Gray-Z50

- ✓ **Available in Ultra door style only**
- ✓ **Specify “Super Matte” on order**
- ✓ **Doors will be edge banded in coordinating color to door face**

Special Order Program Limitations:

- Additional 2-week lead time required. Colors not listed may have longer lead times.
- Consumer must view a sample chip. **NO** color changes once order is in production.
- No products available that require 1.5” edge banding; example: box trim, hevi shelves, etc.
- Cabinets larger than 36” will have the 1.5” interior center post edge banded to coordinate with the interior box only. All vanities will have center posts edge banded in linen to match the interior color.
- The only moldings available in the special-order program are sections 7001, 7002, 7004 – stock A, and 7210 – stock A.
- Leftover panel sheet stock will be stored at Artizen for **90 days** after the cabinetry is shipped. After this time, any leftovers will be disposed. Any product ordered after 90 days will be charged an additional \$2500 list setup fee.

Special Order Sample Pricing

TSS		
\$60	Special Sample Chip	8” x 8” x 8MM
Brillianté, & Zenit		
\$420	Special Sample Door*	12” x 15”
* Door samples are not stocked at Artizen. Expect Lead times of approximately 2-3 weeks on door samples

Dealer Code: 2-_____ Specialty Finish Agreement Page ____ of ____

Artizen Cabinetry wants you to be fully satisfied with your specialty finished cabinetry. Please read the following descriptions. After all your questions about your specialty finish have been answered initial all that apply and sign the agreement below. Your order will not be processed until all required forms are signed and submitted.

_____ Specialty Stains – Charcoal, Dune, Espresso, Heather, Pewter, Sable, & Weathered

These multi-step stains are designed to show some underlying wood grain thru the pigmented color. As every tree is unique, there will be much greater variation in both color and the amount of wood grain showing from door to door. If these characteristics are not desired, we would suggest using opaque enamels to more completely cover the underlying wood grain.

_____ Opaque Enamel

Opaque finishes are uniquely different from stain finishes. Changes in climate conditions cause all wood products to expand and contract. As a result, opaque finished solid wood drawers/doors will show finish breaks and/or seam lines on all solid wood joints and panels as the seasons change. This is the nature of opaque finished wood products and is not a defect in the factory finishing process. Artizen uses MDF drawer/door construction wherever possible to minimize expansion and contraction issues. Opaque finishes are not recommended for use in high humidity environments. The items listed above are normal characteristics of opaque wood finishes and will not be considered as reasons for product replacement.

_____ Accent and Feather Glaze

Our Accent Glaze is hand-applied to the profiles and recessed areas of doors, drawer fronts and moldings to accentuate edge profiles. After glaze application a third finish coat is applied to seal in the finish. This technique only affects the recessed areas where the glaze is applied and will not tone the base stain color. Because this glazing technique is hand-applied, it may have variations in appearance due to different levels of glaze coverage. Some feathering in the corners may occur. These characteristics are natural with hand application and are not factory defects. An SCD15 door sample is recommended to see the full range of application characteristics.

_____ Distressing – Timeworn, Antique, Heirloom

The beauty of distressed furniture is its individuality. All distressing techniques are hand-applied and are designed to be random and unique. No two components will be alike. The distressing characteristics present on my cabinetry may be different from those present on an individual door sample. Additionally, all components may not receive the same number of distressing characteristics.

Agreement

I have read and understand the above Specialty Finish descriptions and all characteristics have been explained to me. I understand that specialty finishes are hand-applied and that every component will be unique. Color and grain variation will not be considered as reasons for product replacement. I will not hold Artizen Cabinetry responsible if these characteristics are present or later develop on my cabinetry.

Your order will not be processed until all required forms are signed and submitted.

Dealer Code: 2-_____ Wood Characteristics Agreement

Artizen wants you to be fully satisfied with your Natural Wood cabinetry. The uniqueness of wood is in its variation in color and grain pattern. Just as no two trees are alike, no two pieces of wood are alike. Please read the following descriptions. After all your questions about natural wood have been answered initial all that apply and sign the agreement below. Your order will not be processed until all required forms are signed and submitted.

Walnut

Walnut is a premium hardwood that has long been prized for its rich beauty, warmth and strength. The grain is generally straight and open, but sometimes has wavy or curly patterns. Color can vary from creamy white to light or chocolate brown, occasionally with darker sapwood streaks, and pin knots. Walnut will "mellow" and lighten as it ages.

Quartersawn White Oak

Quartersawn White Oak (QSWO) is achieved through the old-fashioned method of cutting logs where the logs are first cut into four quarters and then cut on the diagonal from the center of the tree out towards the edges. This method is what gives QSWO its distinctive straight line grain pattern. QSWO will have medullary ray flecks. This fleck pattern may appear reflective and lighter than the surrounding grain after it's stained. NOTE: Medullary flecks are a signature characteristic of QSWO and are not a flaw in the finishing process. Additionally, it is not recommended to mix QSWO and standard Red Oak as they look and stain differently. When selecting QSWO stain colors, only use QSWO color chips or door samples.

Cherry

Cherry is a rich, premium hardwood. Coloring can range from pinkish brown, white, green or yellow. Cherry typically has sapwood, pitch pockets, streaks and pin knots and will darken with age. NOTE: Current cherry color chips are the most accurate representation of color. Depending on the age of cherry color chips or door samples, the darkening process may already have begun.

Alder

Alder is a hardwood that is lighter in weight and softer than other hardwoods. Alder has a fine, straight grain similar to Cherry and Maple with a uniform honey color. Some tight knots are typically present. Alder stains well across the full color spectrum. NOTE: Alder and Rustic Alder veneer will have some repaired knots (3/4" in diameter).

Hickory

Hickory is a strong hardwood with dramatic color variations and grain patterns. Color can vary from white to deep brown in the same piece of lumber, evening out slightly over time. Hickory will have some knots, mineral streaking, pin holes and burls.

Maple

Maple is a dense, straight-grained hardwood with uniform coloring. When stained, Maple can have a mottled appearance and small mineral streaks. Maple will age slightly over time.

Red Oak

Red Oak is known for its strength and stability and has a prominent open grain. Oak ranges in color from white to yellow to reddish brown. Small pin knots and minor mineral streaking are present. Graining may vary from closely knit to a sweeping arch pattern.

Rustic

Rustic is available in Cherry, Alder, Walnut, Hickory and Oak. Rustic components are hand selected to have more pronounced variations of their respective natural characteristics. You'll find greater color variation, more noticeable graining, and additional knots, mineral streaks, burls and pinholes. The level and number of rustic characteristics present on each component will vary. NOTE: An opaque finish on rustic wood will obscure all but the most pronounced rustic characteristics. Woodland will not allow any rustic characteristics to affect the structural integrity of the door and will not allow any open knots. Rustic characteristics are not available on face frames, plywood panels, moldings or accents.

Agreement

I have read and understand the above wood species descriptions and all characteristics have been explained to me. I understand that wood is a natural product and that every component will be unique. Color, natural wood characteristics and grain variation will not be considered as reasons for product replacement. I will not hold Woodland Cabinetry responsible if these characteristics are present or later develop on my cabinetry.

Thank you for displaying Artizen Cabinetry. Artizen Cabinetry is committed to working with our dealers to achieve our sales goals. It's important to have up-to-date and well-designed displays in today's market. We recommend showing higher end door styles with upgrade options. Consumers tend to buy what they see on display. Show high-end products, sell high-end kitchens.

Display Requirements:

- The display must be on the showroom floor for a minimum of 24 months.
- Showroom / Store fixturing does not qualify as a display.
- The display must be price column 3 or higher.
- Layout, door style and finish selections must be approved by your sales representative.

Display Discount:

- 25% off initial invoice
- 2% rebate paid on next 12 months of sales; up to a maximum of an additional 25% of display cost.

By signing below, I acknowledge that I understand the above requirements. Furthermore, I understand that Artizen Cabinetry reserves the right to review and/or refuse all display requests.
