PRAIRIE CABINETRY

Warranty

Prairie Cabinetry hereby warrants its products to the original purchaser, a five-year limited warranty against manufacturing defects in materials and workmanship under normal use and conditions. This warranty begins upon the date of delivery and runs for five years. This warranty is limited to repair or replacement of the defective item and is at the discretion of Prairie Cabinetry. This warranty does not cover unfinished product.

This warranty does not cover defects caused by improper installation, handling, storage, modifications or assembly, exposure to the elements, abuse or negligence. Any product used for any purpose other than the purpose for which it was originally intended is not covered by this warranty. Normal wear and tear of product is not covered by this warranty.

This warranty is limited to repair or replacement of the defective part and does not include the cost of installation of replacement product, removal or transportation of defective product.

Natural woods vary in color and grain patterns as they age. Cabinet colors may change over time due to exposure to light and other environmental conditions. These variations are considered natural and are not covered by this warranty.

Prairie reserves the right to alter design, specifications and materials without obligation to make similar changes to products previously manufactured. If a warranty claim is filed after a style or product is no longer manufactured by Prairie, we reserve the right to honor the warranty with a similar looking substitute. Prairie cannot guarantee that the finish of the replaced components will exactly match the finish of the original items due to the natural aging process that all wood products go through.

This limited warranty, which is in lieu of all other warranties, expressed or implied, shall constitute the entire liability of Prairie Cabinetry and the exclusive remedy for breach thereof. Prairie Cabinetry shall not be liable for incidental or consequential damages of any kind.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This limited warranty gives you specific rights, which may vary from state to state.

Merchandise is not to be returned without proper written authorization from Prairie Cabinetry.

Prairie Cabinetry

WOODLANDCABINETRY.COM

Policies & Procedures

Orders

Prairie requires all orders be sent via your registered email to: orders@woodlandcabinetry.com

The email addresses for all dealers, designers, and sales associates must be registered in order to send orders and receive acknowledgements via email. It is the dealer's responsibility to communicate to Prairie any email address additions, deletions and changes.

Order Processing

Orders must be submitted on approved Prairie order forms via email. Due to the potential for communication errors, phone orders are not accepted. See examples of an order and acknowledgement.

Order Acknowledgements

An acknowledgement is sent via email verifying our interpretation of your order within two (2) business days. If you do not receive an acknowledgement within 2 business days, contact Customer Service to verify the order was received. The acknowledgement will list a **Sales Order Number (SO#)**. **This SO# drives everything in the factory. Always reference the SO# on all correspondence and phone calls.**

The dealer is responsible for verifying the accuracy of the acknowledgement and advising the factory of any corrections. A Delivery week is not scheduled until all questions have been answered and a signed final acknowledgement has been received by the factory.

Order Flow Examples:

Accurate acknowledgement

- Sign the acknowledgement in the designated box and email it back to orders@woodlandcabinetry.com.
- Once received, the order is placed into production, and a ship week is assigned for all dealers with an approved line of credit.
 - **There can be no changes after this point.**
- A final confirmation with the assigned ship week will be emailed.

Acknowledgements that require changes

- Simply note all changes on the acknowledgement, scan and email it to orders@woodlandcabinetry.com immediately.
 - **Do not sign the acknowledgement until you receive a clean acknowledgement with no required changes.**
 - Acknowledgements will be corrected and returned stamped "Revised".
- Once the acknowledgement is correct and accurately represents your order, sign the acknowledgement in the designated box and email it back to orders@woodlandcabinetry.com
 - **Additional changes submitted with a signed acknowledgement will not be made.**
- Once the signed final acknowledgement is received, the order is placed into production, and a ship week assigned.
 - **There can be no changes after this point.**
- A final confirmation with the assigned ship week will be emailed.

Multiple acknowledgements for one job

- Review all acknowledgements in the same job for accuracy.
- Once all acknowledgements are correct and accurately represent your order, sign each acknowledgement in the designated box and email them all in one email to orders@woodlandcabinetry.com
 - **Email all signed acknowledgements for the same job on the same day to insure they ship together and avoid any freight drop charges.**
 - **Do not submit acknowledgements with changes and signed acknowledgements at same time.**
 - This could result in split shipments, delayed shipments, or changes not entered.
- Delays in returning the final acknowledgements with noted changes can result in shipping delays.
- Once the final signed acknowledgements are received, then the order is placed into production and a delivery week assigned.
 - **There can be no changes after this point.**
- A final confirmation with the assigned ship week will be emailed

Expedite Orders

This rush system takes precedence over standard orders.

Expedite orders must be emailed to orders@woodlandcabinetry.com on an Expedite order form.

- Expedite orders have an 25% upcharge.
- Due to tight lead times, no changes are allowed on Expedite orders once placed.
- There are no sign offs on expedite orders.

Writing "RUSH" on a standard order form has no effect on lead times. In order to preserve this program, Prairie must limit orders to no more than two (2) cabinets per Expedite order, unless pre-approved by Customer Service. Most Expedite orders are manufactured within 6 -10 working days and then shipped. Actual delivery time will vary based on product, dealer location and shipping method.

Policies & Procedures

Warranty Orders

Warranty orders must be emailed to orders@woodlandcabinetry.com on a Warranty form and must include the original Sales Order (SO#).

- Due to tight lead times, no changes are allowed on warranty orders once placed.
- There are no sign offs required on warranty orders.
- Due to the potential for communication errors, phone orders are not accepted.
- Most Warranty orders are manufactured within five (5) working days and then shipped.
- Actual delivery time will vary based on product, dealer location and shipping method.

Warranty orders have the highest priority in the factory. If the warranty order is due to a factory defect, specify no charge and give a detailed explanation. If a valid explanation is not provided on the warranty form, it will be charged. No charge replacements can only be made if it is a replacement of an identical item. The only exception to this is if the issue deals with an incorrect shipment. If the Warranty order is due to a dealer or consumer issue, still submit a Warranty form and the replacement product will be invoiced to the dealer.

Freight Charges

Drop Ship Charges: Cabinet orders totaling \$4,000 net and up are delivered with no extra freight charges to approved dealer locations. **Cabinet orders totaling \$3,999 net cost and less will incur additional drop ship charges.** Contact your local Prairie representative or Customer Service for drop charge information in your area.

Shipping Damage & Warranty Claims

If shipment shortage occurs or if damage is obvious at time of delivery, the dealer should note the problem on the delivery receipt. **Concealed damage must be reported within 30 days of delivery in order to receive no charge replacement.** Most issues can be handled with Customer Service; however, Prairie reserves the right to request a factory representative to inspect product prior to replacement in extreme cases involving multiple pieces. All other issues will come under our written warranty.

Returned Goods Policy

Product cannot be returned to factory without a Returned Goods Authorization (RGA) number issued by Customer Service. Product must be returned in manner specified on RGA form in order to have credit issued.

Terms of Sale

Any account with open invoices beyond their stated terms will be considered delinquent. Scheduling production and/or shipment of orders for delinquent accounts may be put on hold until the account is made current, unless prior arrangements have been made with Prairie's Credit Department.

A finance charge of 2.0% per month (24% APR) will be assessed on any past due invoices. All past due balances and finance charges must be paid prior to account reapplying for open account status. Once an account has fallen into delinquent status, there may be a term of 6-12 months where non-standard terms are used. These terms will be determined on an individual basis by Prairie's Credit Department.

Dealer Sample Responsibility

Dealers must maintain current color chips, door samples and displays to be an authorized dealer. Color choices should only be made off current Prairie color chips. Prairie is not responsible for warranty claims and disputes in cases where expired samples were used in the selling process. Color chips should be replaced every 12 months, door samples every 24-30 months, and displays every 3-4 years.

Computer Design Software

Design programs are a tool to help you through the design process and beneficial when quoting a job. Design programs will not have perfect graphics and will allow you to modify cabinetry without including the required upcharges.

Cautions and Guidelines:

- Will not have perfect graphics
- Allow you to manipulate cabinetry without applying required upcharges
- Fractions are not visible on the quote – add a note
- All changes to a cabinet must include **charges** that apply and **notes** explaining the modifications made to that cabinet
- All dimensions must be noted for all modified cabinetry and items built to your specifications (ex. wainscot panels, wood tops, etc.)
- Reference to column Pricing
 - A: Oak
 - B: Alder, Hickory & Maple

Prairie will accept cabinet orders generated by 20/20 and ProKitchen only if it includes the following:

- Order cover sheet
- Cabinet list
 - 20/20: Cabinet list using **Quote Report** and default set to **Manufacturing Code & Descriptions**
 - ProKitchen: **Manufacturer Report**
- All other required forms, ex. Specialty Finish Agreement.

Prairie will generate an acknowledgement based on the information provided by the designer. Do not assume the factory knows what you want. **When in doubt – spell it out, sketch it out, or both.**

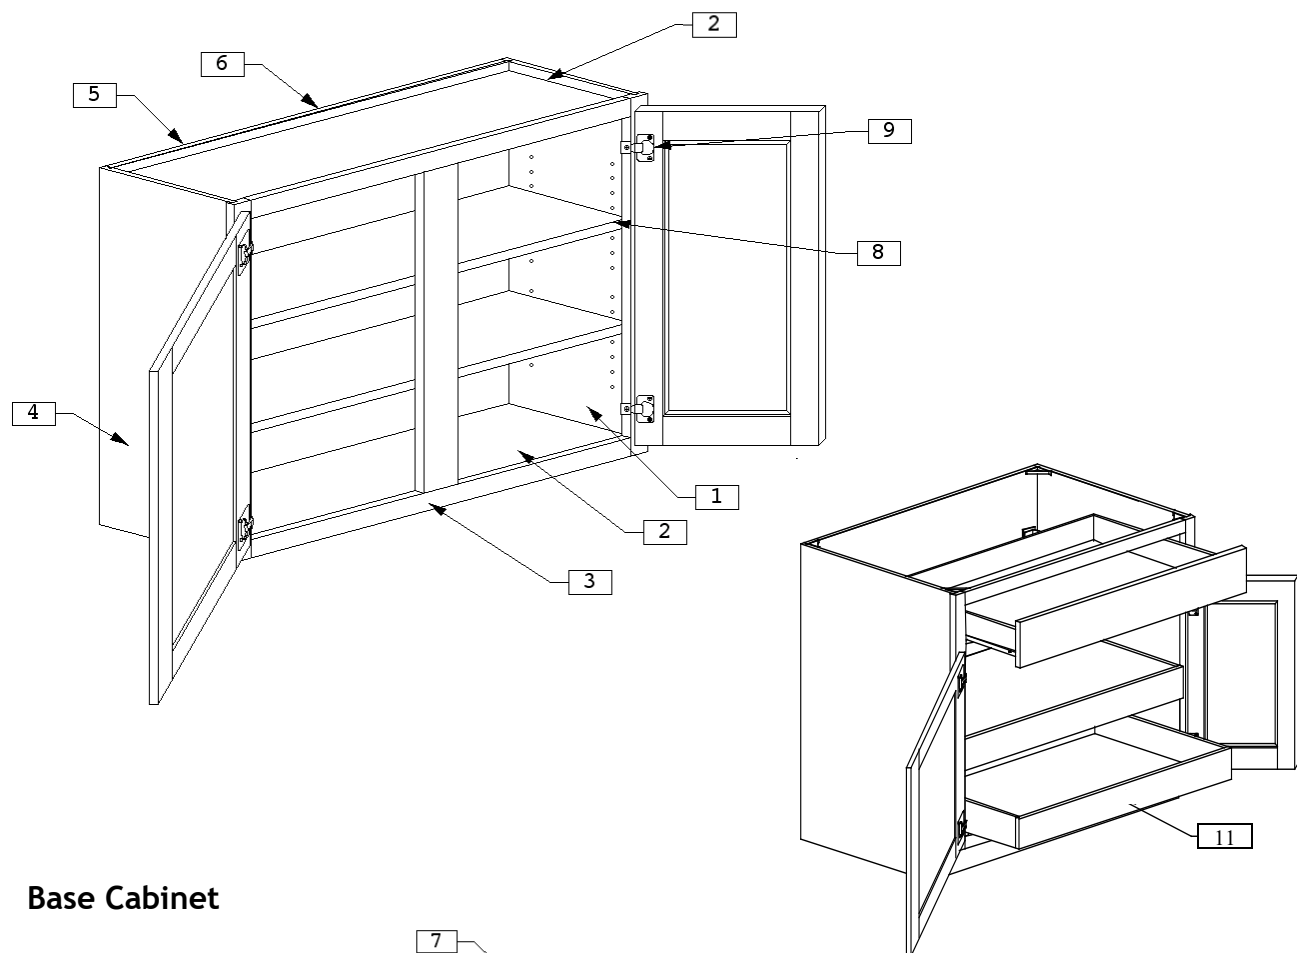

When using any design program, the designer must reference the manufacturer's specification and price book to ensure accuracy when quoting.

Prairie offers both design and design program support (20/20 and ProKitchen).

General Specifications

Wall Cabinet

Base Cabinet

General Specifications

- 1 Interior**
 - Natural maple EasyClean interior
- 2 Top & Floor**
 - 1/2" E-Board with a natural maple EasyClean surface
- 3 Face Frame**
 - Face frame is 3/4" solid wood
 - 3" Wide center stile standard on 30- 48" Wide cabinets except when butt doors (BD)
 - Butt door cabinets 24-36" Wide have no center stile
- 4 Side**
 - 1/2" E-Board with natural maple EasyClean surface; 1/4" scribe
 - Sides are unfinished and do not match cabinet face. Specify finished ends for all exposed ends. See Custom Options for Finished Veneer End
 - See Custom Options for Plywood Sides Only cabinet box upgrade
- 5 Back**
 - 1/4" Dura-board with natural maple EasyClean surface
- 6 Hanger Rail**
 - 1/2" E-Board
- 7 Corner Block**
- 8 Shelves**
 - 3/4" E-Board with natural maple EasyClean surface and deluxe 2mm PVC shelf banding on front edge
 - Adjustable 1 1/4" on center
 - Standard wall cabinets have full depth shelves
 - Standard base and vanity cabinets have one half depth shelf and are drilled for both half and full depth shelves
- 9 Hinges**
 - Standard & Full Overlay: six-way adjustable cup hinge with integrated soft close; hinge opens 110°
- 10 Drawer Box & Glides**
 - 5/8" Birch Veneer Dovetail Drawer Box with side mount epoxy glides; 100 lb. capacity
 - See Custom Options for
 - **PBVDSC** – 5/8" Birch Veneer Dovetail Drawer Box with Full Extension Under Mount Glides with Soft Close
- 11 Roll Out Tray**
 - 5/8" Birch Veneer Dovetail Drawer Box with side mount epoxy glides; 100 lb. capacity
 - See Custom Options for
 - **PBVDSC** – 5/8" Birch Veneer Dovetail Roll Out Tray with Full Extension Under Mount Glides with Soft Close; mounted to adjustable solid wood upright posts
- 12 Toe Kick**
 - Recessed toe is 1/2" E-Board
 - Rough toe kick size: 3 1/2" D x 4 1/2" H
 - Matching plywood toe kick material is required

E-Board

Engineered board constructed of wood fibers bonded together with exclusive bonding agents, which are similar to the resins used in quartz countertops.

Our E-Board is engineered to tighter tolerances for better water resistance and greater stability than most plywood products on the market.

Additional Notes

- Doors:
- Single door cabinets will be hinged left unless specified on order
- Standard Depths & Heights
 - Wall: 12" Deep
 - Base: 24" Deep / 34 1/2" High
 - Tall: 12" or 24" Deep
 - Vanity: 18" or 21" Deep / 34 1/2" High
- Tall: Fixed floor between upper and lower sections is 1/2" E-Board with natural maple EasyClean surface

Prairie Cabinetry reserves the right to change product specifications without notice.

Door Overlay

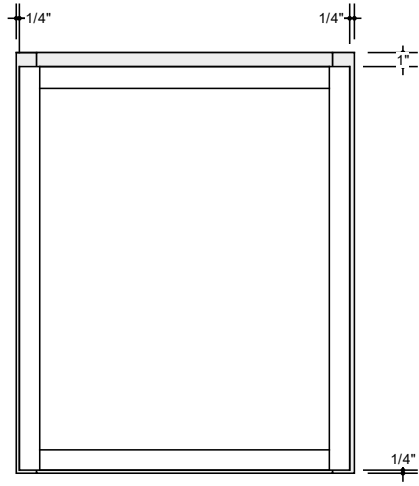

Overlay refers to the amount of face frame that is covered by the door and drawer front. Reveal refers to the amount of visible face frame when the door and drawer fronts are closed.

Prairie offers Full Overlay and Standard Overlay. See details and illustrations below.

Full Overlay

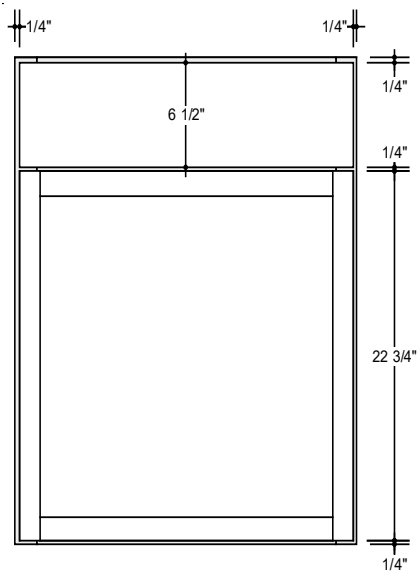

Two Door Cabinets

- 1/2" Reveal between doors
- 1/8" Reveal between Butt Doors (BD)

Wall & Tall Reveals

- 1" Top Reveal
- 1/4" Side Reveal
- 1/4" Bottom Reveal

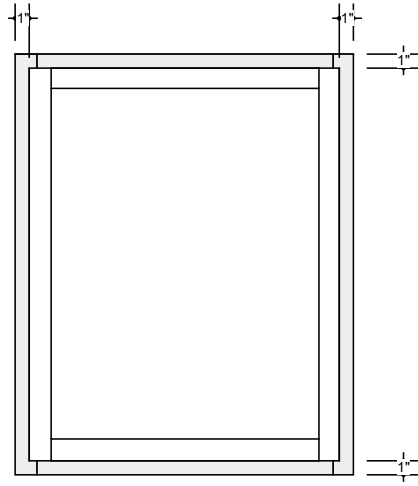

Base / Vanity Reveals

- 1/4" Top Reveal
- 1/4" Side Reveal
- 1/4" Bottom Reveal

Standard Overlay

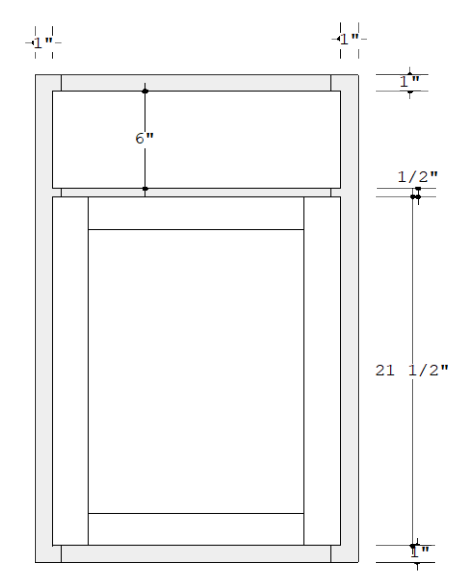

Two Door Cabinets

- 2" Reveal between doors
- 1/8" Reveal between Butt Doors (BD)

Wall & Tall Reveals

- 1" Top Reveal
- 1" Side Reveal
- 1" Bottom Reveal

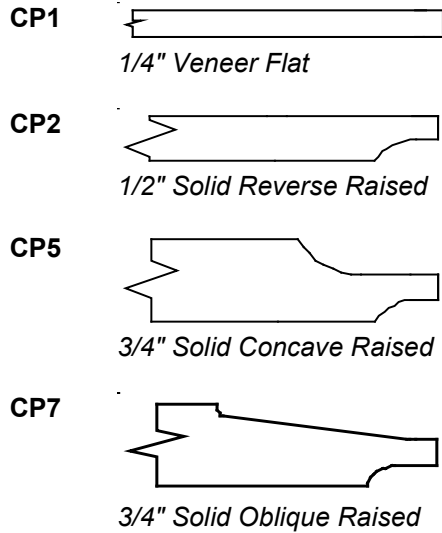

Base / Vanity Reveals

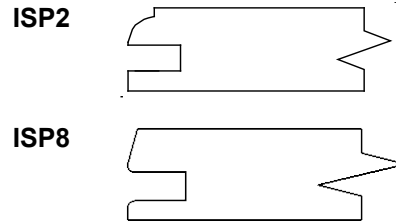

- 1" Top Reveal
- 1" Side Reveal
- 1" Bottom Reveal

Door & Drawer Profiles

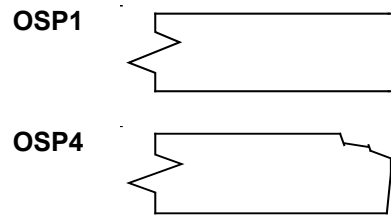

Center Panels

Inside Profiles - Mortise and Tenon

Outside Profiles - Mortise and Tenon

Dovetail Drawer Box Adjustment

Drawer Removal

Drawers may be easily removed as follows:

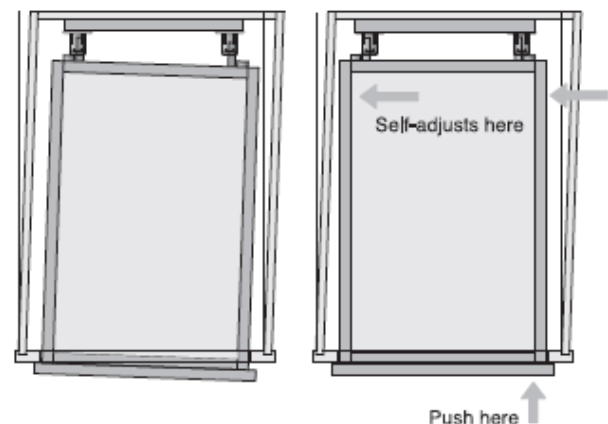

1. Reach below drawer on both sides and squeeze tabs on front locking device to release slide. Pull straight out to remove drawer box.
2. To install drawer box, place on runners and close drawer to engage front locking device.

Height Adjustment

3. Slide tab to rear to achieve height adjustment
Maximum: 1.5mm (1/6").

Self-Aligning Feature

Drawer alignment is easy. Double-captive rollers ensure proper drawer front alignment. After installation is complete, just reinsert drawers and close firmly. The drawers will self-align to bring all fronts into the proper position.

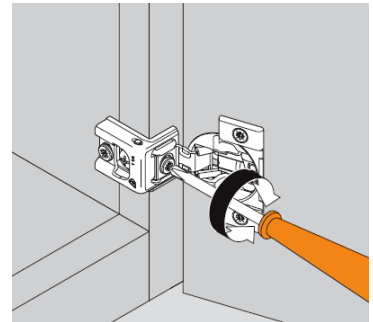

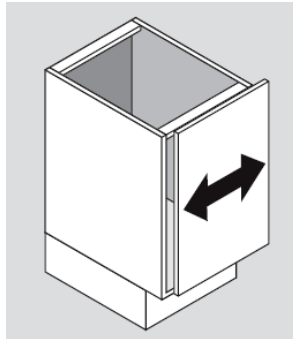

Hinge Adjustment

All adjustment options can be made independently of one another.

Standard & Full Overlay Hinges

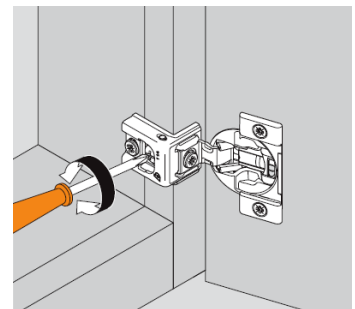

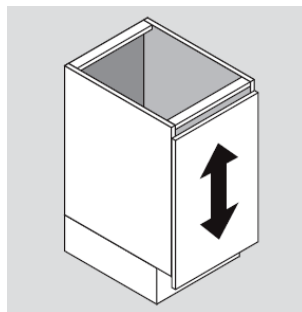

Sides Adjustment

- Rotate the front cam screw to increase or decrease door overlay ($\pm 1/16"$)

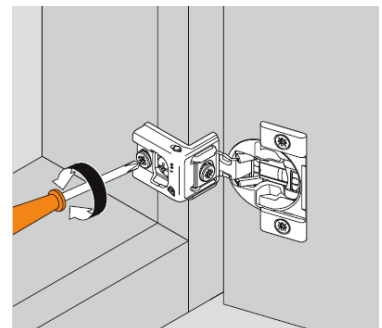

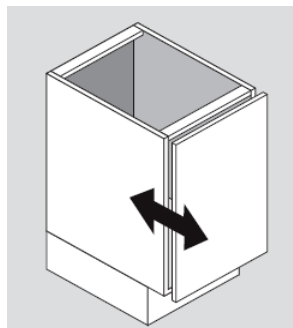

Height Adjustment

- Loosen installation screws to adjust door position, then retighten ($\pm 1/8"$)

Depth Adjustment

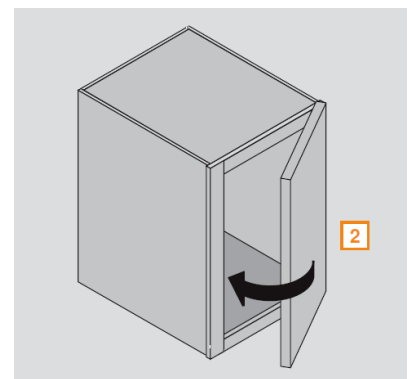

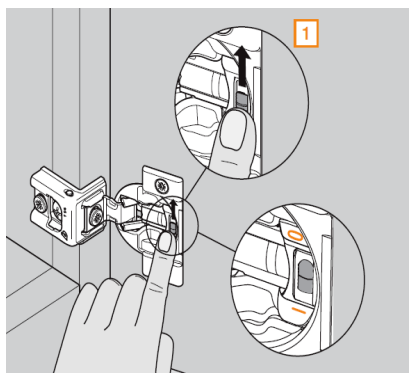

- Rotate the rear cam screw to adjust door gap ($+3/32"$, $-1/32"$)

Deactivation switch on the hinge cup

For small or light doors, the BLUMOTION can be deactivated on one of the hinges.

- BLUMOTION comes in the activated position, marked with an "I".
- The deactivated position is marked with an "O".
- Door must be closed once for the deactivation to be complete.
- To reactivate, move the switch back to the original position, "I".

Cabinet Care & Cleaning

Everyday Cabinet Care

It is important to wipe up any spills and watermarks as they occur. Excessive moisture is one of the worst enemies of any wood and finish. Prairie's fine furniture finish is durable and moisture resistant, but it is not moisture proof.

Clean your cabinets as needed with a lint-free cloth, dampened with warm water only. Use a very mild soap and warm water only if needed. To remove grease, use a 50/50 mix of vinegar and water. After wiping and cleaning an area, dry immediately with a lint-free cloth.

What to Avoid

Avoid the use of scouring pads, harsh chemicals, powdered cleansers or any ammonia-based products to clean your cabinetry. These items will dull and harm your finish. Do not use a dishcloth to wipe your cabinets, since it may contain remnants of grease and other contaminants. Avoid draping damp or wet towels over a door or drawer front. Over time, this constant moisture will cause permanent water damage.

Controlling Humidity and Moisture

Wood's natural response to change in humidity is much more dramatic than the average person realizes. The degree of changes can range up to three-quarters of an inch from summer to the winter months. Below is a table showing (a) how much a cabinet door panel is likely to shrink in low humidity, (b) how much a cabinet door is likely to expand in excess humidity, and (c) the total potential range of dimension changes from a muggy summer to a cold dry winter. During manufacturing, we strive to keep the air in the factory between 40% to 45% relative humidity during the complete manufacturing process.

Total Potential Movement of Solid Wood Panels

Species	Panel Dimension (inches)	(a) Winter	(b) Summer	(c) Annual Range
Maple	20	-0.49	0.10	0.59
Alder	20	-0.27	0.25	0.52
Hickory	20	-0.34	0.31	0.65
Oak	20	-0.32	0.31	0.63

Excessive variations in humidity will cause noticeable changes including, but not limited to:

- White lining of panels
- Excessive gaps or overlapping of doors
- Warping
- Open joints
- Paint cracking or lifting

Prairie Cabinetry's warranty does not apply if product is exposed to extremes in temperature or humidity.

Steps Consumers Can Take to Protect Real Wood Furnishings

- **Monitor & Maintain Your Humidity:** Keep an eye on the humidity inside the home. Reasonably accurate digital thermometer-hygrometer units are available from general goods retailers and hardware stores.
- **Maintain the humidity between 30% and 45% at all times.** There are several ways this may be accomplished. Installing a whole-house humidifier on the furnace is the best method for dry climates. Running a portable humidifier in key areas also helps. In very humid climates, air conditioning helps to dry down the air to the desired range.
- **Don't Over Do It:** Significant condensation on windows is a sign that humidity levels are too high for outside temperature conditions in cold weather.
- **Wood's Response:** It is important to understand that finished wood responds to humidity over several weeks or as long as two months. It takes time before the wood returns to normal after any correction to the environment.

Warped Doors

Prairie's doors are manufactured under strict tolerances and in a moisture-controlled environment. Warping of doors is unusual. Often times adjusting the depth on the hinges will correct any doors that appear warped (See Hinge Adjustment). In most cases, depth adjustment on the opposite corner from the problem area will level out the door. Doors that appear warped must hang through a complete heating and cooling cycle and must be warped a minimum of $\frac{1}{4}$ " before replacement will be considered. To determine if a door is warped, remove the door and lay on a flat surface. If the corners extend more than a $\frac{1}{4}$ " above the surface when alternate corners are pressed then the door is warped.

Installer Duties: It is the installer's job to ensure that cabinets are installed plumb and level using shims to correct for any out of square walls. Racking occurs when a cabinet is forced out of square by improper installation. If cabinets are not installed properly and become racked then the doors will appear warped. In this case the real problem is incorrect installation and even a replacement door will appear to be warped.

Wood Dust Warning

When cutting, sanding, sawing or shaping cabinets or wood products, you are likely to generate wood dust. For your own safety, we recommend that you wear a protective mask to prevent breathing wood dust. We also recommend eye protection during cabinet installation to avoid injury by flying wood chips or sawdust.

Environmental Practices

Environmental & Sustainability Practices

Prairie Cabinetry is committed to environmentally responsible manufacturing procedures. We take pride in processes designed to respect and preserve the environment while still giving our customers the finest custom cabinetry.

Keeping Tomorrow in Mind

Prairie implements the following practices designed to protect consumer health, reduce waste and protect the world we inhabit:

- Meeting the strictest formaldehyde standards set forth by the California Air Resource Board (CARB)
 - o All the E-Board, plywood and components that Prairie uses are CARB 2 compliant.
- Utilizing a distiller to reclaim cleaning solvents
- Investing in technology to optimize the yield of raw wood products and minimize waste
- Recycling or repurposing 100% of all leftover wood remnants

Prairie Cabinetry also commits to on-going learning and thoughtful growth in ways that consistently give our customers the most environmentally supportive cabinetry.

Finishes

Stain

- **Sprayed Stain (+0%)** Cider
- **Multi-Step Stain (+10%)** Sable
- **Hand-Wiped Stain (+0%)** All others

We use three stain options to achieve the highest quality color and coverage. Hand-wiped stains enhance the grain of the wood and create a deep, rich color. Sprayed stains are sprayed on and not hand-wiped. This process is chosen to achieve a more consistent look on tight-grained woods like Maple. Multi-step stains are used to attain darker stain colors. With darker stain colors, the end grain of wood may have a slightly darker appearance. Some color variation is to be expected with all stains and is part of the look of natural wood products.

Paint (+10%)

Our paint finish is a catalyzed paint applied in a 6-step process to achieve a multi-layer and highly durable finish. After every coat of finish, components pass through a series of hand sanding processes that both refine and enrich the overall look and feel for a superior final product. The final step is a clear coat of conversion varnish which is the same durable Finish Coat used on our stained product.

Changes in climate conditions cause all wood products to expand and contract. As a result, painted solid wood components will show finish breaks and/or seam lines on all solid wood joints and panels as the seasons change. To lessen the effects of expansion and contraction, Prairie constructs painted doors and drawer fronts using HDF. Though HDF is more stable than solid wood, hairline cracks, finish breaks and/or seam lines may still occur on painted HDF doors. Face frames are constructed of solid maple; finish breaks and/or seam lines will occur on frame joints. Paint finishes are not recommended for use in high humidity environments. Customers must be educated on the normal characteristics of painted wood finishes as they will not be considered as reasons for product replacement

Construction of maple doors with paint finish will change as follows:

Door Style	Opaque		Opaque Rustic
¼" Veneer Center Panel	Door Frame	Solid Wood	n/a
	Center Panel	HDF	
	Drawer Front	HDF	
Raised / Plus Center Panel	Door Frame	Solid Wood	Solid Wood
	Center Panel	HDF	Solid Wood
	Drawer Front	HDF	Solid Wood
Solid Veneer Slab	Door	HDF*	Solid Wood
	Drawer Front	HDF	Solid Wood

✓ **REQUIRED FORM:** Specialty Finish Agreement must be completed and submitted with order.

Accent Glaze (+8%)

Our Accent Glaze is hand-applied to the profiles and recessed areas of doors, drawer fronts and moldings to accentuate edge profiles. After glaze application a third finish coat is applied to seal in the finish. This technique only affects the recessed areas where the glaze is applied and will not tone the base stain color. Because this glazing technique is hand-applied, it may have variations in appearance due to different levels of glaze coverage. Some feathering in the corners may occur. These characteristics are natural with hand application and are not factory defects. A P-SCD15 door sample is recommended to see the full range of application characteristics.

✓ **REQUIRED FORM:** Specialty Finish Agreement must be completed and submitted with order.

Finishes

Unfinished

Unfinished cabinetry is available for No Charge. Cabinet exterior will be unfinished. Interiors, interior accessories and bottoms of wall cabinets will be finished per standard finishing methods. It is the finish coat that protects wood cabinetry from the effects of temperature and humidity variations. Thus, unfinished cabinetry is not warranted for warped doors, drawer fronts and wainscot panels; field applied finishes are also not covered under the warranty. Prairie Cabinetry does not recommend unfinished cabinetry.

Finish Coat

Prairie features a multi-step finish coat finish process that enhances the natural beauty of wood and gives our cabinetry the durability to withstand the elements of everyday life. Each component is hand prepared to ensure the highest quality. Once the cabinet is stained it moves to our state-of-the-art flat line finish system. Flat line application removes the guesswork found in hand spraying and applies each finish coat with precise accuracy. The first coat is an oven-cured conversion varnish, applied to give a superior seal. After hand sanding, a second coat of conversion varnish is applied and oven-cured to create a final product that has both the look of fine furniture and exceptional durability. Sheen level 20.

Prairie's finish meets or exceeds all standards set by the Kitchen Cabinet Manufacturers Association (KCMA) and is recommended by the American Woodworking Institute. Prairie's finish technology and its finish formulation greatly reduce the hazardous pollutants found in the finish process. Our goal is to protect the environment while still achieving the highest possible quality.

Natural wood variations and conditions in the home will affect the final appearance of any wood product. Direct sunlight, temperature, humidity and environmental elements are all factors that contribute to the true color of a finish. Please consider these conditions as your cabinetry ages.

Finishes

Natural Wood Characteristics

The uniqueness of wood is in its variation in color and grain pattern. Just as no two trees are alike, no two pieces of wood are alike. It is important to educate the consumer on each wood's natural characteristics.

Maple is a dense, straight-grained hardwood with uniform coloring. When stained, Maple can have a mottled appearance and small mineral streaks. Maple will age slightly over time.

Alder is a hardwood that is lighter in weight and softer than other hardwoods. Alder has a fine, straight grain similar to Cherry and Maple with a uniform honey color. Some tight knots are typically present. Alder stains well across the full color spectrum. **NOTE: Rustic Alder veneer will have some repaired knots (3/4" or more in diameter). Knots on veneer door center panels will vary and some panels may not have any knots present.**

Hickory is a strong hardwood with dramatic color variations and grain patterns. Color can vary from white to deep brown in the same piece of lumber, evening out slightly over time. Hickory will have some knots, mineral streaking, pin holes and burls.

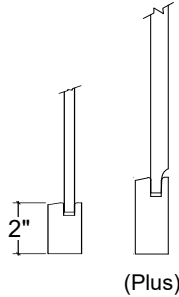

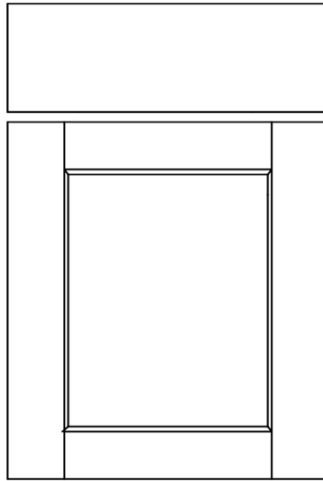

Red Oak is known for its strength and stability and has a prominent open grain. Oak ranges in color from white to yellow to reddish brown. Small pin knots and minor mineral streaking are present. Graining may vary from closely knit to a sweeping arch pattern.

Rustic is available in Alder, Hickory and Oak. Rustic components are hand selected to have more pronounced variations of their respective natural characteristics. You'll find greater color variation, more noticeable graining, and additional knots, mineral streaks, burls and pinholes. The level and number of rustic characteristics present on each component will vary. Prairie will not allow any rustic characteristics to affect the structural integrity of the door and will not allow any open knots. Rustic characteristics are not available on face frames, plywood panels, moldings or accents.

Hoods

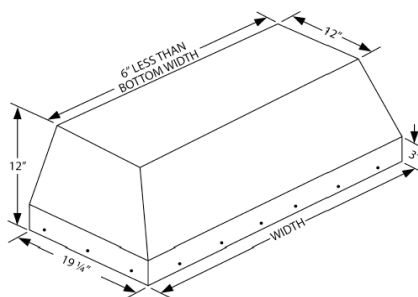

All wood hoods are designed to fit a specific liner/blower. Prairie Cabinetry is not responsible for verifying specifications or compatibility of alternative liner/blower products. Vent-A-Hood liner/blower pricing is not included in hood price and must be ordered separately.

1500 Vent-A-Hood Liner / Blower Unit

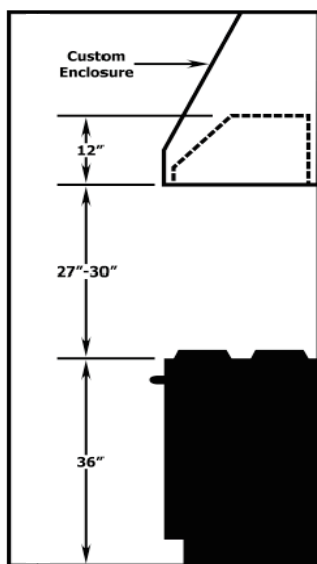

*Exceeding recommended mounting height may compromise performance.

- Fits inside a 21" deep bottom hood section
- For external venting only
- 300 cfm fire safe unit
- Two speed fan and two 50-watt halogen hi-low light
- Stainless steel finish
- Blower motor has a 5 year warranty
- Design Tip: Recommended that bottom edge of liner be installed 24-27" above cooking surface

	Charge

Specialty Finish Agreement

Page _____ of _____

Prairie Cabinetry wants you to be fully satisfied with your specialty finished cabinetry. Please read the following description. After all your questions about your specialty finish have been answered initial and sign the agreement below. Your order will NOT be processed until all required forms are signed and submitted.

Paint

Paint finishes are uniquely different from stain finishes. Changes in climate conditions cause all wood products to expand and contract. To lessen the effects of expansion and contraction, my doors and drawer fronts are constructed of HDF. Though HDF is more stable than solid wood, hairline cracks, finish breaks and/or seam lines may still occur on painted HDF panel, stile and rail joints. Face frames are constructed of solid maple; finish breaks and/or seam lines will occur on frame joints. Paint finishes are not recommended for use in high humidity environments. The items listed above are normal characteristics of paint finishes and will not be considered as reasons for product replacement.

Accent Glaze

Our Accent Glaze is hand-applied to the profiles and recessed areas of doors, drawer fronts and moldings to accentuate edge profiles. After glaze application a third finish coat is applied to seal in the finish. This technique only affects the recessed areas where the glaze is applied and will not tone the base stain color. Because this glazing technique is hand-applied, it may have variations in appearance due to different levels of glaze coverage. Some feathering in the corners may occur. These characteristics are natural with hand application and are not factory defects. A P-SCD15 door sample is recommended to see the full range of application characteristics.

Agreement

I have read and understand the above Specialty Finish descriptions and all characteristics have been explained to me. I understand that specialty finishes are hand-applied and that every component will be unique. I will not hold Prairie Cabinetry responsible if these characteristics are present or later develop on my cabinetry.

Dealer Code: 1- _____ **Wood Characteristics Agreement** Page _____ of _____

Prairie Cabinetry wants you to be fully satisfied with your Natural Wood cabinetry. The uniqueness of wood is in its variation in color and grain pattern. Just as no two trees are alike, no two pieces of wood are alike. Please read the following descriptions. After all your questions about natural wood have been answered initial all that apply and sign the agreement below. Your order will not be processed until all required forms are signed and submitted.

Alder

Alder is a hardwood that is lighter in weight and softer than other hardwoods. Alder has a fine, straight grain similar to Maple with a uniform honey color. Some tight knots are typically present. Alder stains well across the full color spectrum. NOTE: Rustic Alder veneer will have some repaired knots (3/4" or more in diameter). Knots on veneer door center panels will vary and some panels may not have any knots present.

Hickory

Hickory is a strong hardwood with dramatic color variations and grain patterns. Color can vary from white to deep brown in the same piece of lumber, evening out slightly over time. Hickory will have some knots, mineral streaking, pin holes and burls.

Maple

Maple is a dense, straight-grained hardwood with uniform coloring. When stained, Maple can have a mottled appearance and small mineral streaks. Maple will age slightly over time.

Oak

Red Oak is known for its strength and stability and has a prominent open grain. Oak ranges in color from white to yellow to reddish brown. Small pin knots and minor mineral streaking are present. Graining may vary from closely knit to a sweeping arch pattern.

Rustic

Rustic is available in Alder, Hickory and Oak. Rustic components are hand selected to have more pronounced variations of their respective natural characteristics. You'll find greater color variation, more noticeable graining, and additional knots, mineral streaks, burls and pin holes. The level and number of rustic characteristics present on each component will vary. Prairie will not allow any rustic characteristics to affect the structural integrity of the door and will not allow any open knots. Rustic characteristics are not available on face frames, plywood panels, moldings or accents.

Agreement

I have read and understand the above wood species descriptions and all characteristics have been explained to me. I understand that wood is a natural product and that every component will be unique. Color, natural wood characteristics and grain variation will not be considered as reasons for product replacement. I will not hold Prairie Cabinetry responsible if these characteristics are present or later develop on my cabinetry.

Email Registration

Page _____ of _____

Complete this form to register your email address with Prairie Cabinetry. Once your email is registered, you'll be set up to send/receive orders electronically via email.

All your order communication – submitting orders/expedites/warranties, receiving acknowledgements and making revisions – is via one order entry email address: orders@woodlandcabinetry.com

Program Details

- Once registering your email with Prairie, all order communication must be emailed in.
- One email address per designer/salesperson. Orders may be submitted only via your registered email. Acknowledgements will be returned to the same registered email address.
- Expedites, warranties and revisions must also be submitted via email to orders@woodlandcabinetry.com
- To ensure proper delivery, add the order entry email to your address book:
orders@woodlandcabinetry.com
- Please keep your email address current. Use this form to inform Prairie of an email address change or to remove an email address from our system.
- Privacy: Prairie will on occasion use your email to communicate promotions and updates, but will never share your email with outside vendors.
